CELEBRATING ARL

THE RESEARCH LIBRARY LANDSCAPE has experienced continuous and, at times, dramatic change over the past 75 years. Throughout this period, research library leaders have come together in ARL to advocate steadfastly for systems of scholarly communication that support barrier-free, enduring, and equitable access to classroom and research resources and for laws, policies, and practices that reflect a balance of respect for and robust use of intellectual property. While the opportunities for pursuing these goals in affordable and innovative ways have changed over the years, the values underlying the agenda have remained constant.

These steadfast values are reflected in ARL's current strategic directions of Scholarly Communication; Public Policies; and Research, Teaching, and Learning (RTL). The newest of these three objectives formally adopted in 2005 is RTL, which charges ARL with promoting and facilitating new and expanding roles of research libraries to engage as academic partners in the transformations affecting research and undergraduate and graduate education.

It is perfect symmetry then that ARL's 75th anniversary planning committee developed a program and a project that epitomize our community's time-tested values. Those of us here today are fortunate to hear firsthand the inspirational keynote remarks of Hunter R. Rawlings III, Professor and President Emeritus of Cornell University, on "Libraries in Higher Education and a Democratic Society." We are also fortunate to participate in a wonderful gala celebration in the Great Hall of the Library of Congress.

The project commemorating the anniversary is a splendid book and companion Web site titled *Celebrating Research: Rare and Special Collections from the Membership of the Association of Research Libraries*. The compilation presents illustrated and highly readable profiles of selected rare and special collections. The essays salute the stewardship of past decades and celebrate the research enabled by these collections. Taken together, the essays also represent a window into the future of research libraries, as they illustrate some of the active library collaborations underway with local and remote communities to encourage use of these materials and to identify new resources of all formats that are important to collect and steward for future users.

On behalf of all ARL libraries, we thank the members of the planning committee and those organizations and individuals who provided encouragement and essential support that enabled this distinctive commemoration of ARL's milestone.

■ ARL LEADERSHIP, 1932–2007

From 1932 to 1962, the Association of Research Libraries was governed by an Executive Secretary and an Advisory Committee, both elected by the membership. When the ARL secretariat was established in 1962, a full-time Executive Secretary was appointed and the Advisory Committee was replaced by a Board of Directors, including three officers (Chairman, Vice Chairman, and Past Chairman). In 1967, the titles were changed to Executive Director and President.
